

Is Creativity In Your DNA?

| | |
|-------------------------|--|
| Project Title | Is Creativity In Your DNA? |
| Project Summary | Utilize animation and visual storytelling techniques to explain how your genes (DNA) work and how they may affect your health; work with scientists to translate complex medical and genomic research information into visual content that Veterans and their families can understand. |
| Country | United States |
| Country/Region of Focus | United States |

Project Description

The Million Veteran Program (MVP) is the biggest research program of its kind IN THE WORLD; brilliant scientists from over 130 locations across the country are looking for ways to personalize how we treat Veterans when they get sick and predict illnesses before they happen. With over 750,000 Veteran partners already enrolled in MVP, we're looking for 2 innovative interns to help us keep our Veteran partners informed about MVP by developing engaging and educational animated video content for web and social media outlets. We're looking for someone who's ready to think outside the box and use their skills in videography, motion design (After Effects) to help us package scientific information differently

Required Skills or Interests

| |
|--------------------------------|
| Skill(s) |
| Design thinking |
| Graphic design |
| Infographic design |
| Social media management |
| Storytelling/blogging/vlogging |
| Videography |

Additional Information

You'll be part of an awesome Washington, DC-based national program office, a small but mighty team of creative and energetic professionals that supports a nation-wide staff of scientific researchers and other medical personnel. We're looking for people willing to work hard, while having fun and making science understandable!! You don't have to be a scientist - we've got those - we need innovators! We're getting ready to roll out a new MVP Online site but for now visit <https://www.research.va.gov/mvp/> to learn more.
